

European Centre for Medium-Range Weather Forecasts

VACANCY NOTICE

Date of Issue: 26 January 2010

- FUNCTION:** **Systems Analyst in the Server and Desktop Section**
- GRADE:** A2, according to the scales of the Co-ordinated Organisations.
- REFERENCE NO:** AP10-04
- LOCATION:** ECMWF Headquarters at Shinfield Park, near Reading, Berkshire, United Kingdom.
- ENVIRONMENT:** The European Centre for Medium-Range Weather Forecasts (ECMWF) is an international organisation supported by 31 States*. Its prime objectives are the operational production of analyses, medium-range forecasts of weather and ocean waves and seasonal forecasts as well as scientific and technical research directed to the improvement of these forecasts. ECMWF operates a large computing facility including supercomputers, data archiving systems and networks. For details see:

www.ecmwf.int/services/computing/overview

This post is in the Servers and Desktops Section of the Computer Division.

- MAIN DUTIES:** The main duties will include:
- system administration of
 - Windows systems: both servers and desktops/laptops;
 - Unix/Linux systems - desktops, general purpose servers, file servers, print servers, email servers etc.;
 - resolving problems users encounter with desktop PCs, laptops, servers and associated services;
 - participating in the provision of a 24 hour call-out support service.

QUALIFICATIONS: A university education to degree standard or equivalent is required, coupled with at least two years of relevant professional experience. The successful candidate should have experience in system administration and supporting users preferably in a heterogeneous environment, with strong skills in centralised administration of Microsoft Windows systems and applications using system management tools.

In addition, experience in or knowledge of some of the following technologies is a distinct advantage: Active Directory, XML, SQL, VMware or other virtualisation systems, Linux, Unix systems, shell scripting, Perl, LDAP.

The successful candidate should be proactive and have good analytical skills; excellent interpersonal skills are essential for this position, which involves direct interaction with users to both understand the problems they experience and explain to them how to use the systems successfully. He or she should have a high level of professional skills, but in acknowledging the diverse nature of the work, ECMWF will provide training where necessary.
