E-learning tools and techniques

Jarno Schipper

Jean Paul Billerot

Eleni Hadjigeorgiou

Jaymie Gadal

Jeff Wilson

Jean-Michel Tanguy

Ervin Zsoter

- At this moment for a lot of trainers to start using e-learning tools is difficult. There is a high threshold for trainers to use them effectively. The tools are not well documented. They are fragmented. An ocean of tools is available but they need to be categorised and documented clearly and by this decreasing the threshold. How can we mix these tools.
- It is not the job of this working group to make the content. To develop training material. It is our job to consult the other working groups with what tools would be applicable for them.
- There needs to be a catalogue of good and bad practises of the application of the tools.
- There should be forum (Jaakko) for discussion of this working groups on what tools can reach the effective result.
