Key Questions (i)

- Which Users and Applications?
- Which ECVs?
- Which Geophysical parameters ?
- What Product Levels ?
- What Epoch(s) ?

Key Questions (ii)

What Data Sources ?

- How many Versions ?
- Independent Validation ?
- Uncertainties ? also Validated ?
- Current state-of-art ?

Key Questions (iii)

- Open ?
- Traceable ? Repeatable ?
- Benefits & Impact ?

Key Questions (iv)

- How?
- How Long ?
- How Often ?
- What Systems ?
- Who and where ?

Which users and applications?

- EC Services, Council & Parliament
- Member States
- International Climate Research Community
- General Public, Media & Educational
- => Mitigation => Adaptation
- are source of requirements
- should be engaged throughout
- assess impact
- give critical feedback
- will always have the last word....

Which ECVs?

33 ECVs & 7+ indicators -

Observed, re-analyzed and model projected products

ATMOSPHERE

Surface Air Temperature
Surface Precipitation
Water Vapor
Surface Radiation Budget
Earth Radiation Budget
Carbon Dioxide & Methane
Ozone & Aerosols
Cloud properties
Upper Air Temperature
Other Long-Lived GHGs
Wind Speed & Direction

OCEAN

Ocean Color
Sea Ice
Sea Level
Sea Surface Temperature
Global Ocean Heat Content

CO2 partial pressure Ocean Activity Sea Surface Salinity Current Salinity

LAND

Snow Cover
Glaciers & Ice Caps
Albedo
FAPAR
Fire Disturbances
Ice Sheets
Lakes
Permafrost
Land Cover
Leaf Area Index
Soil Moisture

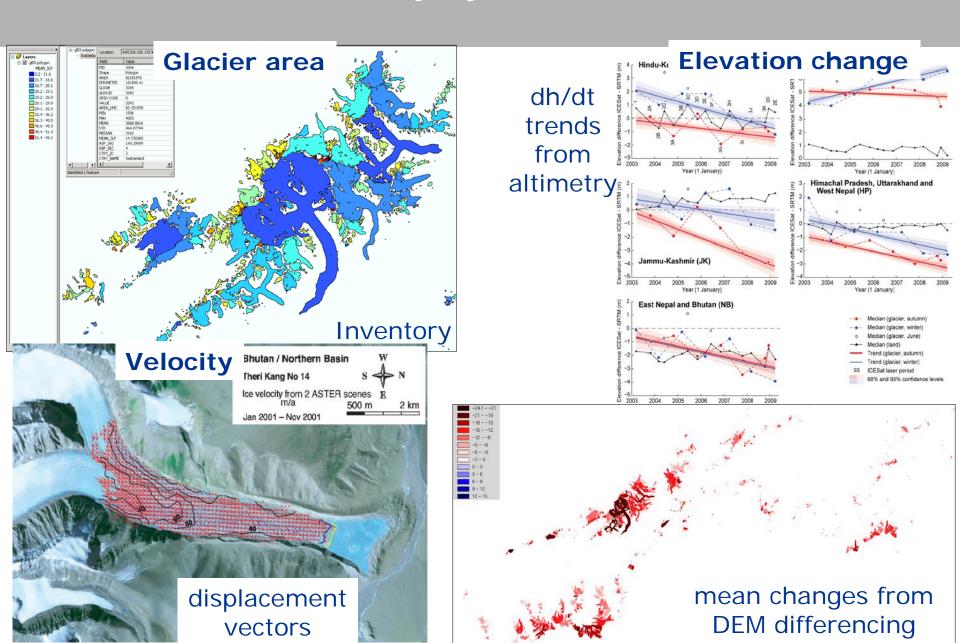

ESA CCI & Eumetsat ECV capabilities

Atmosphere	Ocean		Terrestrial				
Composition	Surface						
Aerosol Properties	Sea Surface Temperature		Land Cover				
Methan & Long Lived GHGs	Sea Level		Fire Disturbance				
Ozone	Sea Ice	Sea Ice		Soil Moisture			
Carbon Dioxide	Ocean Colour		Glacier and Ice Caps				
Precursors (for Aerosol & O3)	Sea State		Ice Sheets				
Upper Air	Current		Snow Cover				
Cloud Properties	Sea Surface Salinity		Albedo				
Temperature	Carbon Dioxide Partial Pressure		Leaf Area Index				
Water Vapour	Phytoplankton		FAPAR				
Wind Speed and Direction	Ocean Acidity Lakes						
Earth Radiation Budget	Sub Surface	b Surface Above Ground Biomass		ass			
Surface	Carbon Permafrost						
Surface Air Pressure	Current		Ground Water				
Surface Air Temperature	Nutrients		River Discharge				
Surface Precipitation	Ocean Acidity		Soil Carbon				
Surface Radiation Budget	Oxygen		Land Surface Temperature				
Water Vapour (Surface Humidity)	Salinity						
Near-surface Wind Speed	Temperature	EUMETS		CCI Started	CCI Scope		
	Tracers	LOIVILIS		oor ottaited	cor scope

How many ECV versions?

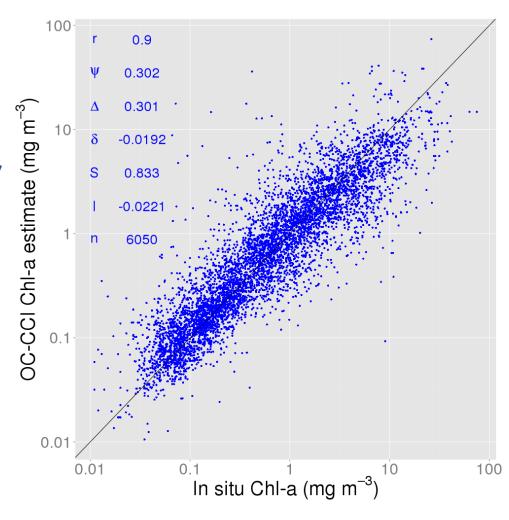

Validation Independent?

Match-up analysis

In situ datasets

- •MERMAID (MERIS Match up in-situ Data: 2007
- Present
- •MOBY (Marine Optical Buoy program): 1996 Present
- •NOMAD (NASA bio-Optical Marine Algorithm Data): 1997 2007
- SeaBASS (SeaWiFS Bio-optical Archive and Storage System): 1997 – 2012
- •AMT (Atlantic Meridional Transect): 1995 Present
- •AERONET-OC: 2001 Present
- •Bedford Institute of Oceanography Bio-optical
- Database: 1997 Present
- Boussole (Buoy for the Acquisition of Long Term Optical Time Series): 2005 - Present

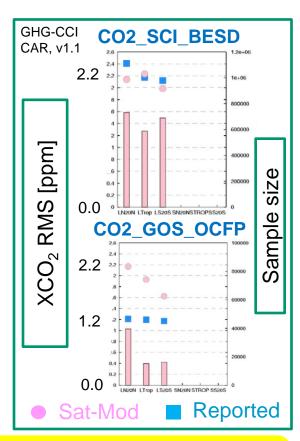

Uncertainties | Uncertainties | Participation | Participation

"Uncertainty validation" by validation team using TCCON as reference:

XCO ₂ Product	Mean value of Reported Uncertainty	Ratio True / Reported Uncertainty
CO2_SCI_BESD	2.3 ppm	0.99
CO2_SCI_WFMD	3.2 ppm	1.24
CO2_GOS_OCFP	1.0 ppm	2.18
CO2_GOS_SRFP	0.7 ppm	2.88
CO2_EMMA v1.5a	3.0 ppm	0.92
CO2_EMMA v1.5b	2.1 ppm	0.99
CO2_EMMA v1.5c	2.0 ppm	0.97

Dils et al., GHG-CCI Phase 1 Final Meeting, 30 Oct. 2013

Verification by CRG using model as reference:

Consistent findings from inital validation / verification of reported uncertainties: Reported uncertainties are realistic for most products but not for all (for two XCO₂ products approx. a factor of 2 too optimistic, see above). This will be improved in Phase 2.

Current State-of-the-art?

Requirement	GCOS (2011)	SST CCI URD L3/L4 breakthrough'	SST CCI Ph 1 target	SST CCI Ph 1 result
Accuracy / demonstrated on scale	0.1 K / 100 km	0.02 K / 100 km	0.1 K / 1000 km	Generally ~0.2 K / regionally
Precision	None	0.05 K / 100 km	Varies, quantify it	Varies, quantify it
Stability (retrospectively assessable against tropical moorings only, using current methods)	0.03 K / decade	0.02 K per decade; 0.05 K seasonally, diurnally	0.05 K per decade, 0.05 K seasonally	Mostly <0.05 K per decade for 1996 – 2010; seasonal stability generally ~0.2 K, locally greater
Spatial resolution	1 km	0.1 deg	0.05 deg	0.05 deg
Temporal resolution	Daily	Day/night (UTC)	Day/night on standardized local time (L2, L3); daily (L4)	Day/night on standardized local time (L2, L3); daily (L4)
Uncertainty information	None	Total uncertainty	Total and components	Total and components
Type of SST	Blended	Skin & buoy-depth	Skin and buoy-depth	Skin and buoy-depth
Period		~1980 - now	1991 - 2010	1991 - 2010

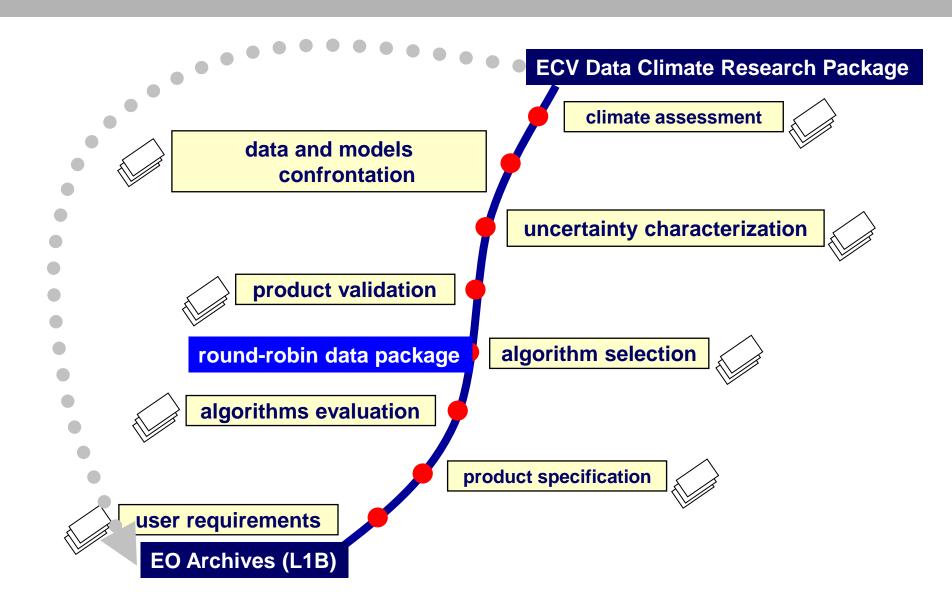

Open - Traceable - Repeatable ?

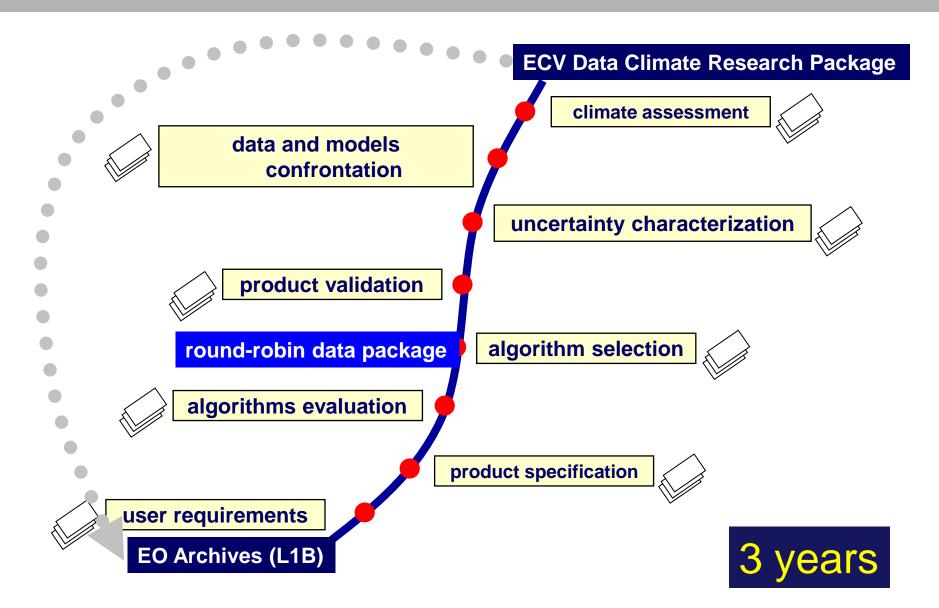

How?

How?

How often? Annual cycle => "operation"

Management

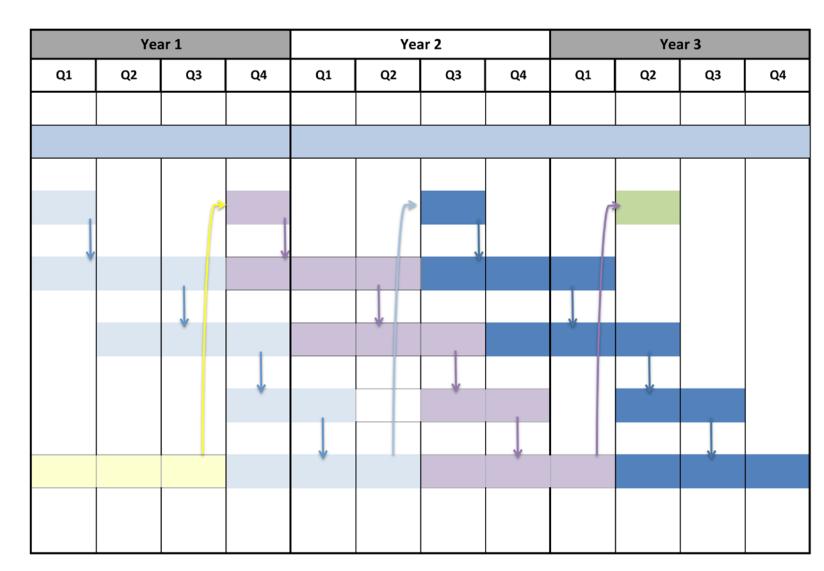

Requirements Management

Algorithm Development

System Evolution

Production

Climate Assessment

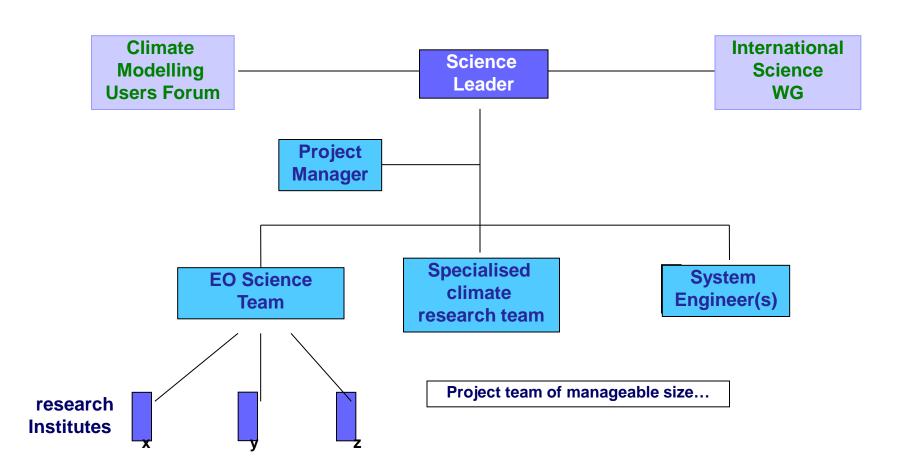

What System(s)?

Who?

one dedicated team per ECV

Who and where? Network of 14 distributed teams

Satellites Ground Segments

ESA

Eumetsat

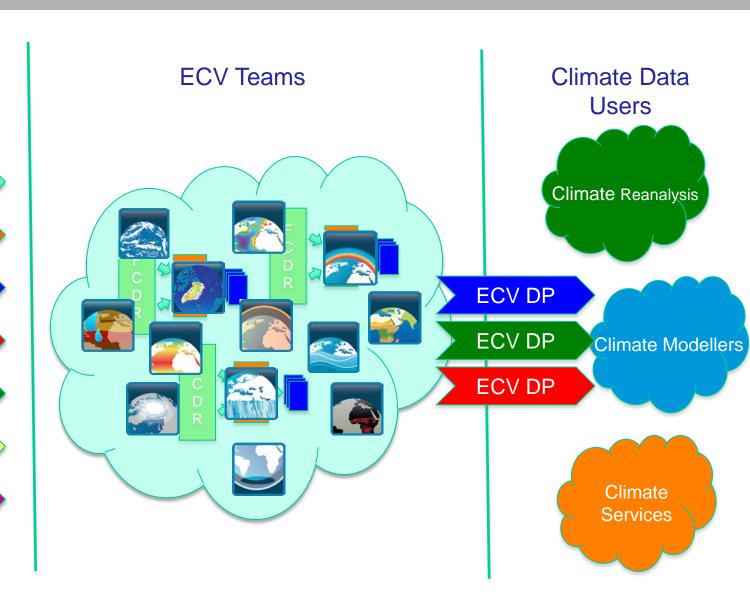

NASA

NOAA

Jaxa

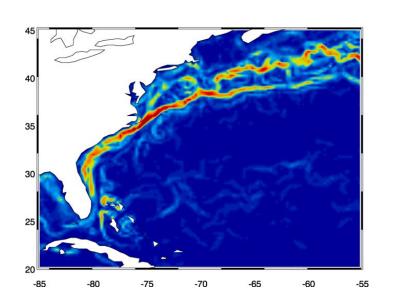

...

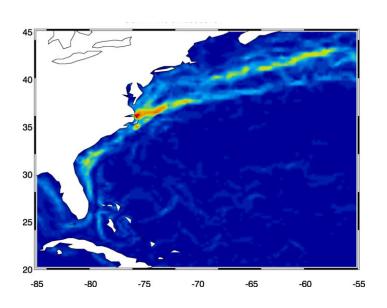

Others

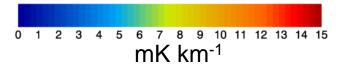

Benefits - Impacts ?

ESA SST CCI on 01 Jan 2006

MyOcean OSTIA v1.0 on 01 Jan 2006

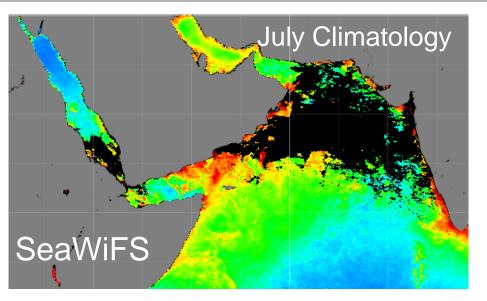

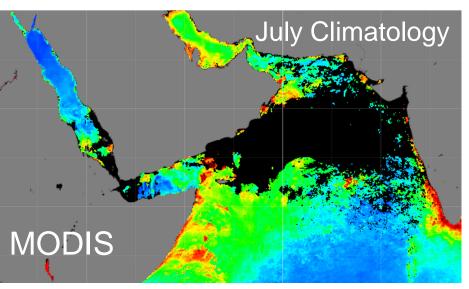

Horizontal SST gradients are greater for SST CCI cf. precursor dataset, illustrating the improved resolution of ocean features.

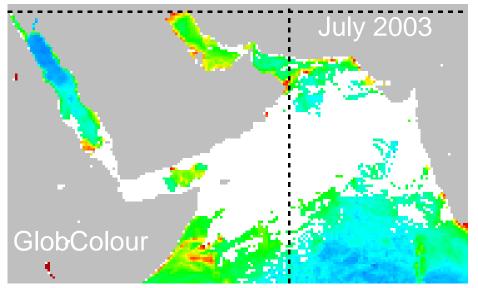

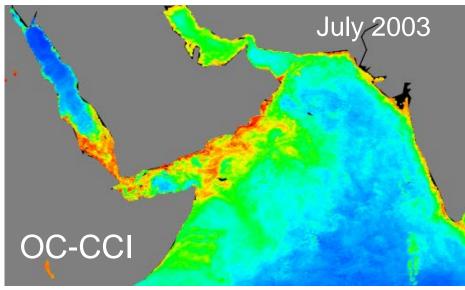

Benefits - Impacts ?

Ocean Colour

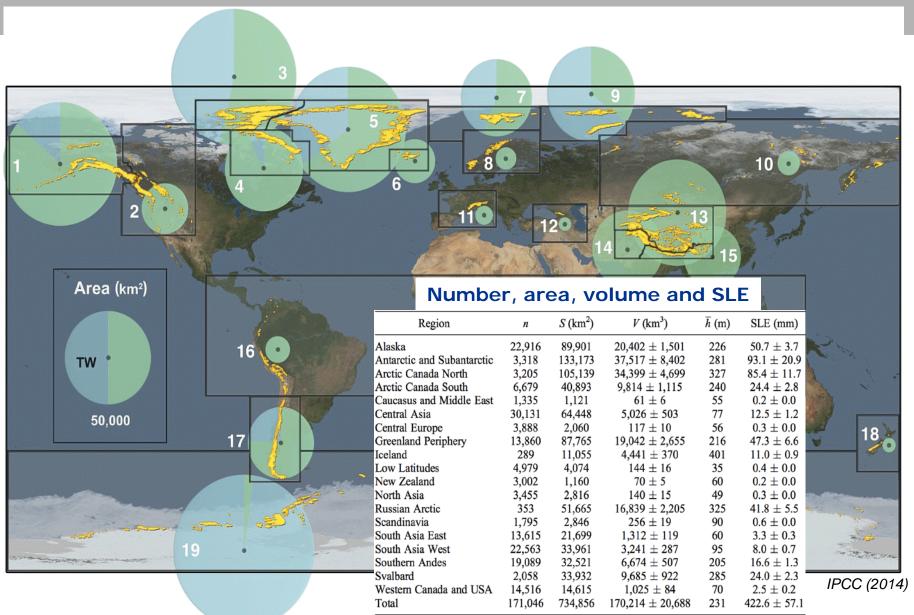

Benefits - Impacts?

esa The Randolph Glacier Inventory / IPCC AR5

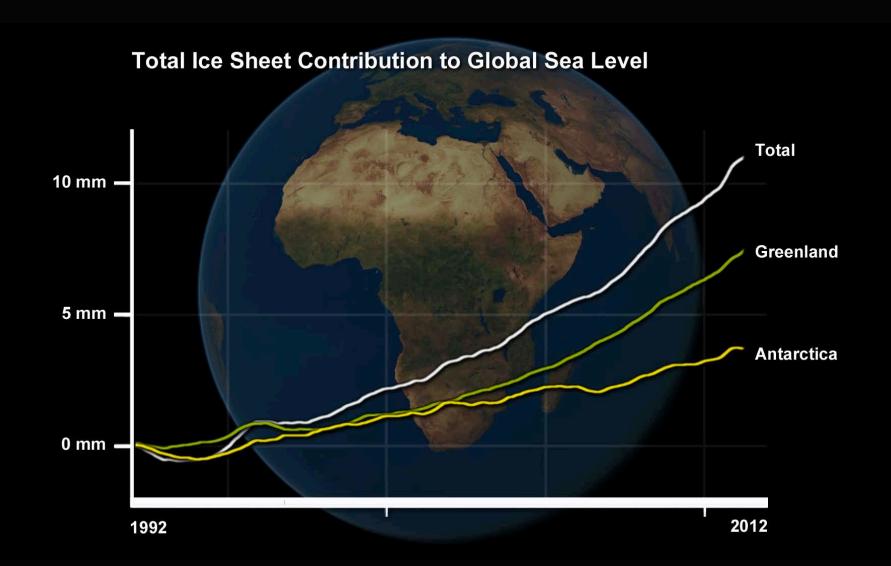

Huss and Farinotti (2012)

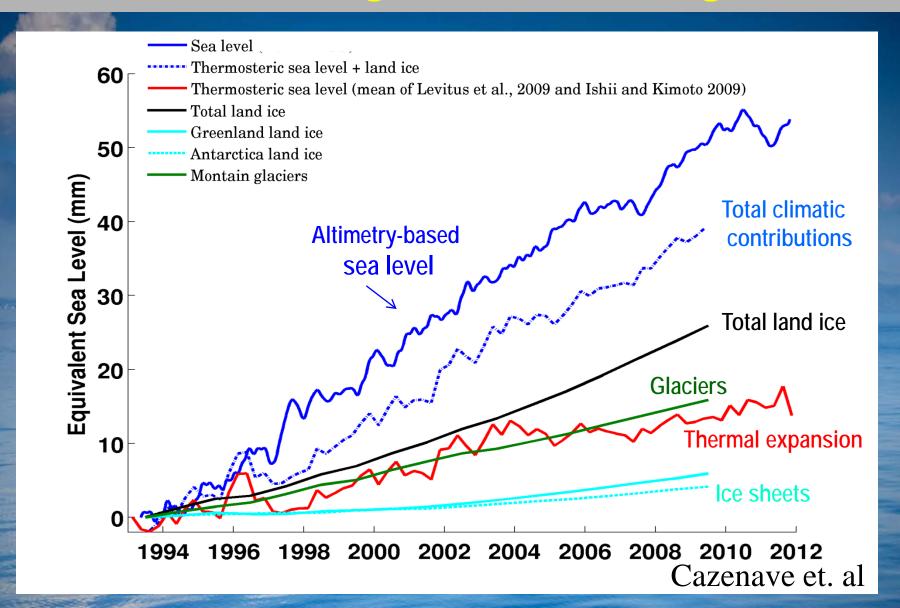

Benefits - Impacts ?

Reconciled Ice Sheets Mass Balance

Benefits - Impacts? Closing the sea-level budget

Key Questions (iv)

• Feasible ?
